Total Quality Management (TQM) was a process used in higher education beginning in the 1980s and greatly expanded in popularity in the 1990s (Marchese, 1993). The model has also been termed continuous quality improvement (CQI), total quality improvement (TQI), or total quality (TQ) but all focus on the concepts of total quality management.

UniCommons.com (2009-2014)

UniCommons.com is a collaborative learning platform for classes and academic content. Pronounced YOU-nee-commons, the name conveys a sense of togetherness in learning. "Uni" is a recognized contraction of "university" and also means "one" in the formation of compound words ("Uni," n.d.). This project focuses on a return to the original meaning of university as "a community of masters and scholars" ("University," n.d., para. 1). "Commons" represents shared ground or a shared road ("Concurrency," 2008) whereby learners at UniCommons.com may share a common platform to develop and present their scholarship.
